

PRECAUTIONARY DO NOT DRINK NOTICE

Este informe contiene información muy importante sobre su agua potable.
Por favor vea el aviso traducido, a continuación, o hable con alguien que lo pueda traducir.

**Daggett Community Services District water is possibly contaminated
with Coliform and E.coli Bacteria.**

DO NOT DRINK YOUR WATER

Failure to follow this advisory could result in illness.

Due to a recent water outage caused by a line break, Daggett Community Services District, the State Water Resources Control Board, Division of Drinking Water, and the San Bernardino County Department of Public Health are advising all persons served by Daggett Community Services District to use only bottled water for drinking and cooking purposes as a safety precaution to avoid stomach or intestinal illness.

Affected area: all customers served by the Daggett Community Services District.

What should I do?

- **DO NOT DRINK YOUR TAP WATER---USE ONLY BOTTLED WATER.** Bottled water should be used for all drinking (including baby formula and juice), brushing teeth, washing dishes, making ice and food preparation **until further notice**.
- **DO NOT TRY TO TREAT THE WATER YOURSELF.** Boiling, freezing, filtering, adding chlorine or other disinfectants, or letting water stand will not make the water safe.

We will inform you when tests show that water is safe to drink in terms of the bacteriological quality of the water, and you no longer need to use bottled water for drinking and cooking purposes.

For More Information:

If you are concerned about your health or the health of a family member, contact your health care provider or San Bernardino County Health Department.
